

**GRAY WATER DISTRICT
SPECIAL TRUSTEES' MEETING
August 13th, 2018**

Present: Joe Murray, Steve Dunn, Andrew Edson and Superintendent Jim Foster. Bruce Sawyer arrived at 7:55 pm. Joe called the meeting to order at 7:02 pm. Bruce Fowler of Sevee & Maher Engineers was present as speaker.

Route 26A Groundwater Monitoring: GWD Round 23 May 2017:

Bruce Fowler showed Trustees what he has compiled thus far regarding the sodium study. He showed the Trustees the data he has compiled in the form of a map detailing sodium levels at various test well sites as well as the corresponding dates. Bruce expressed that, even after contacting many sources for test result info, there are still holes which make it hard to make any meaningful determination as to where the sodium is coming from exactly. He did, however, point out places where he felt very confident that are not contributing to the increased sodium levels due to underground water flows. Bruce is to add groundwater contours to the map and find wells that can be tested now to give us a better idea of what's happening. He will compile some information for "next steps" then Jim and Trustees can decide how to move forward.

Joe made a motion to adjourn at 8:42 pm. Steve seconded, vote was unanimous.

Respectfully submitted,

Sudiek Lester
